

## REVOLUTIONARY INNOVATION IN DETOX AND ANTI-AGEING WORLD

MEGA NFC® medical<sup>10</sup> is a premium quality, 100% natural, medical product composed of activated volcanic clinoptilolite zeolite, silica, and over 30 essential minerals.

The precise dosage, combination, and ion activation of these components make MEGA NFC® medical<sup>10</sup> a remarkable compound with very strong detoxification, anti-ageing and antioxidant properties.

Micronisation is performed through the innovative technological process HENA® (High Energy Nature Activation), which enhances the minerals with optimal properties for the human body and maximizes their curative effects. The product has been created by German scientists, produced in Germany and registered in Europe as a medical product, with all the required certifications. HENA® technology is used exclusively for the production of MEGA NFC® medical<sup>10</sup>.

First of all, the product enables detoxification of the body. However, it is far more than a normal enterosorbent. Through the unique process of selective ion exchange this product can neutralize and remove toxins and heavy metals. At the same time, the body's own essential minerals are not adsorbed, as has been shown in clinical tests. More than 30 essential minerals, being part of the product, enhance and improve the body's natural mineral balance. This miracle-powder clears the symptoms of allergies and eczemas, boosts the immune system and helps to cope with chronic stress.

This product is a powerful antioxidant, which neutralizes free radicals. Furthermore, it contains high-quality colloidal silica, which helps to strengthen connective tissues. This mineral is hailed as 'the Beauty Mineral' by the cosmetic industry.

MEGA NFC® medical<sup>10</sup> has a long list of beneficial impacts, from regulation of the work of kidneys and digestion system, to prevention of major medical conditions and general rejuvenation of the body.

MEGA NFC® medical<sup>10</sup> also have their own cosmetics range, featuring a unisex regenerating cream, face masks for deep and effective detoxification, as well as anticellulite body wraps. These highly effective products are derived from only natural minerals and oils, and are suitable for all ages and skin types.
